saw that it
was good.***

(Genesis 1:12)

WORLD FOOD DAY

October 16 is World Food Day - a day designated to raise public awareness about the global struggle against hunger and malnutrition.

- There is enough food in the world to feed everyone, but over 870 million people do not have enough to eat.
- At least 70% of the people who regularly go to bed hungry live in rural areas of developing countries. It is often small-scale farmers that are the most food insecure.
- Hunger and malnutrition hit children hardest. Children who do not have enough nutrient-rich food are at a higher risk for stunted growth and disease.

God created the earth to sustain us all, yet hunger and malnutrition persist today.

PWS&D is working with Canadian Foodgrains Bank and partners overseas to help farmers produce more food and ensure there is enough for all.

As an individual, community or congregation you can get involved. Make a donation, hold an event, start a growing project or participate in the Harvest of Letters.

Visit WeRespond.ca for more information on how you can join the movement to end hunger.
